Group Project: Research Design Draft

Hypothesis: Individuals that are out of college are more likely to oppose tuition-free college compared to those that are in college.

Demographic questions:

1. How old are you?
2. What is your highest level of education?/Are you currently attending college?
3. Where do you identify yourself in the political spectrum?

5 unique questions:

1. Approximately what is your yearly income?
2. Are you a first-generation student?
3. Are you or did you previously take out loans to pay off your college tuition?
4. **Political psychology strategy: fear**

[Randomly display the following text before the other sentence]

Currently, the student debt in the United States is 1.521 trillion dollars.

[Show to all respondents]
